

## Paramesh 868

The flagship in the Paramount Steel Fence mesh security range is the Paramesh 868 mesh security fence. A highly versatile product which can be configured for a wide range of applications.

Design and specification of the 868 fence panel are similar to the Parasports mesh range and benefits from the removal of the traditional "V" beam. This in turn offers a less obtrusive appearance whilst maintaining a high level of security.

The wires used to produce the mesh fencing are either 6.0mm or 8.0mm in diameter. The increased diameter provides additional rigidity, excellent resistance to attack by a more determined offender whether by person or hand tools, and better performance in areas with a high wind speed.

- ✓ Standard mesh fence panels are manufactured with a mesh pattern of 200mm x 50mm centres.
- ✓ Panels are supplied 2.5m wide and standard heights of 1.2m, 1.8m, 2.0m, 2.4m.
- ✓ Optional 3.0m high panels can be supplied by special order.
- ✓ Standard posts are manufactured using 60mm x 60mm x 2mm wall thickness.
- ✓ The product is finished using a Pre-galvanised treatment, and then polyester powder coated in any RAL colour.

When the fence line is viewed at a distance, the appearance provides a rugged and durable feel, which is also combined with strength and integrity. Paramesh 868 has been installed successfully on educational establishments and retail parks which needed a higher security solution than conventional mesh fencing system could offer.

## Innovative British Fencing Solutions

### Autocad Design

Our state of the art drawing office uses the latest in Autocad design ensuring both compatibility and accuracy with your individual site requirements.

### UK Manufacturing

Paramount Steel Fence has manufactured in the UK since 1984. With over 30 years of experience we can provide secure solutions for use in most environments.

### Long Life Cycle

All of our products are designed to provide the end user with years of trouble free service. We offer Galvanising, Pre treated systems, and Powder coating in any RAL colour within our product portfolio.

### National Deliveries

Operating a national fleet of HGV vehicles including rigid lorries and articulated units, ensures we maintain fast and reliable distribution of our products around the UK.

Installation and erection of Paramesh 868 is a simple and straight forward process. Paramesh 868 is erected in the same manor as other typical mesh fencing systems, making installation on level or undulating ground a straight forward process.

Fence panels are attached to the mounting post by means of a fixing clip, which is held in place using an 8mm secure tamper resistant fixing. This type of fixing reduces the risk of unauthorised removal attempts and general vandalism.

Applications include:

- ✓ Offices
- ✓ Shopping centres
- ✓ Schools and colleges
- ✓ Town centres
- ✓ Playgrounds and recreational sites
- ✓ Storage facilities
- ✓ Vehicle compounds
- ✓ Commercial and Industrial
- ✓ Utility companies
- ✓ Zoos and safari parks
